

Latent Features Legend

0: Metacognitive Uncertainty Marking	1: Problem Identification and Task Framing	2: Stepwise Numerical Computation and Substitution
3: Hypothetical Counter-Argument and Defense Generation	4: Integrative Conclusion Synthesis	5: Formula Selection and Setup
6: Retrieval of Background Knowledge or Definitions	7: Extraction and Listing of Given Facts or Problem Data	8: Implication and Consequence Elaboration
9: Explicit Calculation Step Outputs	10: Expanding the Scope of Consideration	11: Metacognitive Prompting for Memory Retrieval or Structured Reasoning
