

## Latent Features Legend

0: Conditional Causal Consequence Generation	1: Calculation Execution and Intermediate Result Reporting	2: Extraction and Restatement of Problem Data
3: Formula Recall and Specification	4: Stepwise Problem-Solving Initiation	5: Implications and Consequences Elaboration
6: Local Plausibility Evaluation (Self-Monitoring)	7: Expanding the Scope of Consideration	8: Generating Hypothetical Arguments or Counterarguments
9: Mental Arithmetic and Estimation Steps	10: Synthesis and Final Answer Selection	11: Problem Identification and Framing
12: Metacognitive Expression of Uncertainty
